Alan,

I would like say that it has been a real pleasure working with you these past months locating and acquiring additional space for our manufacturing operations. The process took quite some time to materialize, but your tireless efforts and hard work resulted in Radant being able to occupy a facility which meets the needs and is conveniently located to our main facility and workforce.

I appreciated your professionalism, patience and perseverance throughout, the time you took to understand our needs and to show only those properties which could possibly fit the requirements of our operation.

I would like to say "Thank You" from all of us at Radant Technologies for a job well done and look forward to the new facility.

Thanks again and best wishes,

Robert P. Baldelli
Manager/Facilities
